Enhanced protection for the home.

EVoline® BackFlip

The EVolineBackFlip sits nearly flush on the work surface - when closed - the giving enhanced protection against liquid spillages. At a touch of a finger, it turns 180 degrees to reveal 2x power sockets and a USB charger.

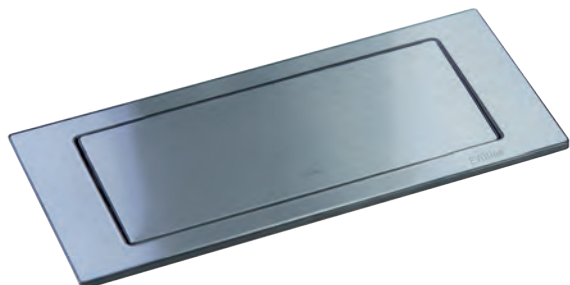

The raised position provides further protection against spillages. With a total installation height of just 53 mm, the BackFlip can be fitted above most drawers, including a cutlery drawer.
